

Notice of Privacy Practices (HIPAA)

This Notice of Privacy Practices outlines how your Protected Health Information (PHI) may be utilized and disclosed by our clinic, as well as how you can access this highly sensitive information under the Health Insurance Portability and Accountability Act (HIPAA). We are legally mandated to maintain the strict privacy of your PHI and to provide you with a detailed accounting of our legal duties regarding your medical records.

Your PHI may be used internally by our clinical staff for the purposes of treatment, payment, and routine healthcare operations. For example, your assigned physician may share your diagnostic results with a consulting specialist, or our billing department may securely transmit your diagnostic codes to your insurance provider to facilitate payment. Aside from these operational necessities, we will not disclose your PHI to any external third parties - including family members or employers - without your explicit, written authorization.

You possess several critical rights regarding your health data. You have the right to request a physical or electronic copy of your complete medical record, request amendments to any information you believe is inaccurate, and request an accounting of all external disclosures we have made of your PHI over the past six years. Furthermore, you have the right to request that we restrict how we use or disclose your PHI for treatment or payment purposes, though we are not legally obligated to agree to all restriction requests. If you believe your privacy rights have been violated, you may file a formal complaint with our designated Privacy Officer or directly with the Secretary of the Department of Health and Human Services.
